

Eco-Initiatives at Trillium Church

At Trillium, “Care for the Earth and all Creation” is one of our Core Values. Here are some of the ways that we are working to bring this value to life in our church:

Native Plant Gardening

Trillium is promoting native plant gardening. Last spring, we grew and gave a number of native plants to the families of the children and youth as well as to others wishing to receive them. We are also establishing a native plant garden at the church and promoting awareness of the importance of choosing native plants to support insects and pollinators.

Faith Climate Justice

Trillium has joined with “Faith, Climate, Justice”, an inter-faith community based in Waterloo Region who works to advocate for climate crisis solutions, to share resources and ideas for projects that can be undertaken locally. Check out their website at <https://www.faithclimatejustice.ca/>
